This verification of conformity is based on an evaluation of a sample of the above mentioned product. Technical Report and documentation are at the manufacturer's disposal. This is to indicate that the tested sample is in conformity with all provisions listed on this verification at the same time the tests were carried out. This verification does not imply assessment of the production of the product and does not permit the use of a TÜV Rheinland mark of conformity. The manufacturer may indicate compliance by signing a Declaration of Conformity themselves and apply the mark to the products identical to the tested samples.
